2018 First quarter sales Good start to the year

In the first three months of 2018 Givaudan recorded sales of CHF 1,308 million, an increase of 5.0% on a like-for-like basis, and 5.4% in Swiss francs compared to the previous year.

Givaudan started the year with good business momentum and with the project pipeline and win rates being sustained at a high level. The good growth was achieved across all product segments and geographies, with recent acquisitions all continuing to contribute positively. The Company continues to implement price increases in collaboration with its customers to compensate for the increases in input costs.

The Company reaffirms its 2020 ambition to create further value through profitable, responsible growth. Building on the first two years of this strategic cycle in 2016 and 2017, Givaudan's 2020 ambition is built on the three strategic pillars of growing with its customers; delivering with excellence; and partnering for shared success.

As part of the Company's 2020 strategy, Givaudan also seeks to create value through targeted acquisitions, which complement existing capabilities in providing winning solutions for its customers. Since 2014 Givaudan has announced eight acquisitions, which are fully in line with the growth pillars within the Company's 2020 strategy.

Ambitious financial targets remain a fundamental part of Givaudan's strategy. We aim to outpace the market with 4-5% sales growth and a free cash flow of 12-17% of sales, both measured as an average over the five-year period of our strategic cycle. It is Givaudan's intention to maintain its current dividend practice as part of this ambition.
